EXPERIENCE

CodePath - Cyber 101 Tech Fellow | Remote

July 2024 – November 2024

- Trained and supported 30+ students in foundational cybersecurity concepts, acting as a teaching assistant
- Led small group sessions and reinforced key topics including incident response, threat awareness, and data security

Ulta Beauty - Order Management Systems Intern | Remote

June 2023 – August 2023

- Worked on IBM Sterling (OMS) application enhancements and bug fixes both front-end and back-end
- Daily use of Confluence, JIRA, and Cherwell
- Participated in team discussions leading to the successful implementation and design of the order management system

Projects

ScrapBooth – 3-Tier Web Application | Chicago, IL

July 2024 – November 2024

- Developed a collaborative web application enabling users to organize and share travel memories
- Rotated across multiple roles: Project Manager, IT Security Lead, UI/UX Designer, and Full-Stack Developer (front-end & back-end).
- Designed the user interface and experience, implemented front-end and back-end features, and built a Vault server for secrets management.
- Led sprint planning, task assignments, and coordinated progress using Agile project management tools.
- Strengthened expertise in UI/UX design, web application security, Agile collaboration, and full-stack development.
