EDUCATION

New York University - Tandon School of Engineering – Remote Exp. 2028

Masters in Cybersecurity

- Currently enrolled in the Cyber Fellows program, focused on advanced cybersecurity skills and hands-on learning in network defense, incident response, and applied cryptography.

Illinois Institute of Technology – Chicago, IL

May 2025

Bachelor of Science in Information Technology and Management

- Relevant coursework: Object Oriented Programming, Software Development, Data Modeling, Statistics, Cyber Security Technologies, Cyber Defense, Open-Source Operating Systems, Front-End Web Development, Project Management

SKILLS & CERTIFICATIONS

- **Analytics and Modeling:** Python, SQL, R, Excel, R- Studio, Power BI
- **Programing and Dev:** Java, HTML, CSS, JavaScript, React, XML
- **Cloud & IT Tools:** AWS, Azure DevOps, Docker, GitHub, VirtualBox, Linux
- **Business & Productivity Tools:** JIRA, Confluence, Cherwell, Figma
- **Cyber Security Tools:** Wireshark, Nmap, Kali Linux, Shell Scripts
- **Certifications:** Microsoft Cybersecurity Analyst, Google Cybersecurity, CodePath Cyber 101

EXPERIENCE

CodePath - Cyber 101 Tech Fellow | Remote July 2024 – November 2024

- Trained and supported 30+ students in foundational cybersecurity concepts, acting as a teaching assistant
- Guided students through technical offering personalized feedback and strategies to help them succeed
- Led small group sessions and reinforced key topics including incident response, threat awareness, and data security

Ulta Beauty - Order Management Systems Intern | Remote

June 2023 – August 2023

- Contributed to the Order Management System (OMS) — the platform that fulfills customer orders across channels including Buy Online Pick Up In Store (BOPIS), Same Day Delivery (SDD), and Ship to Store.
- Improved store associate workflow by consolidating BOPIS and SDD orders into a single action button, using HTML and XML updates to streamline order processing and enhance system usability.
- Utilized API Tester to create and validate XML order requests, ensuring server responses aligned with expected order outcomes.
- Debugged order release issues with Java, XML, and DB Query, analyzing backend tables to resolve discrepancies that caused failed or delayed orders.
- Participated in daily Agile standups, providing progress updates on tickets and collaborating with cross-functional developers.

Projects

ScrapBooth – 3-Tier Web Application | Chicago, IL

January 2025

- Developed a collaborative web application that allows users to organize and share travel memories.
- Designed and implemented the user interface and experience (UI/UX) with a focus on usability and accessibility, and integrated front-end components with the application's back-end services.
- Built and configured a Vault server for secrets management, securing sensitive application data and strengthening overall system security.
- Led Agile sprint planning, task assignments, and progress tracking to ensure timely delivery of project milestones.
